

Cyber attack:

Notice to staff and all healthcare professionals using the practice IT system

15 May 2017

On 12 May, the NHS, along with many other organisations, experienced a cyber attack, which may affect our IT systems.

NHS Digital has received no reports of patient data being compromised but we are obviously taking this threat very seriously.

Please ensure you:

- Avoid opening any attachments in emails and social media
- Do not use USB sticks

What to do if a computer is infected:

- Disconnect the computer from the network
- Contact (*relevant staff member*) on extension (*number*)
- Use paper Encounter forms
